

ADIS HEGIC

SOFTWARE ENGINEER

PROFILE

Frontend focused software engineer with experience building modern web applications using React, Next.js and TypeScript.

I actively use AI tools to accelerate development, improve code quality and explore new solutions - from prototyping to debugging and implementation.

With a background in automation engineering and team leadership, I bring a structured, problem-solving mindset and thrive in collaborative, fast-paced environments.

EXPERIENCE

ADIGIC

Founder & Software Engineer | CEO

Sep 2025 - Present

Founder and software engineer at ADIGIC, delivering digital solutions for businesses.

- Manage the full lifecycle - sales, client relations, development, deployment and maintenance
- Build modern, responsive web applications using React, Next.js and TypeScript
- Use AI tools to improve efficiency, prototyping and problem-solving
- Focus on delivering high-quality solutions and long-term client value

Novalo Technologies

Frontend Developer | AI-integrated applications

Nov 2024 - May 2025

Contributed to the development of a car validation platform with AI-powered features.

- Built and improved UI components using React, Next.js, Typescript and Tailwind CSS
- Collaborated closely with backend developers in a cross-functional team
- Worked in an Agile/Scrum environment (daily stand-ups, sprint planning)
- Used AI tools to assist with development, debugging and implementation of features
- Helped integrate frontend with backend services and APIs

GKN Automotive

Automation Electrician | Team Leader

Jun 2015 - Present

Led maintenance work and coordinated team priorities in a high demand production environment.

- Troubleshoot and programmed PLCs (Siemens, Fanuc) and industrial robots (ABB)
- Ensured operational stability and fast issue resolution
- Developed strong skills in problem-solving, leadership and working under pressure

EDUCATION

Frontend Developer

EC Utbildning

Aug 2023 - Jun 2025

Electrical & Automation

Wijkmanska Gymnasiet

Aug 2012 - Jun 2015

SKILLS

- React
- Next.js
- Vue.js
- TypeScript
- JavaScript
- HTML
- CSS
- Vite
- Tailwind CSS
- Git
- Agile/Scrum
- Rest APIs
- AWS
- ChatGPT
- Github Copilot
- Claude Code

LANGUAGE

- Swedish
- English
- Bosnian

PROJECTS

SELECTED PROJECTS

A selection of products and projects I've built. From in-production tools used by real customers to personal projects and experiments.

Qlaro - Web Application

In Production Sole Developer

Qlaro is a workflow management tool for craftsmen and small businesses, covering everything from quotes to invoicing.

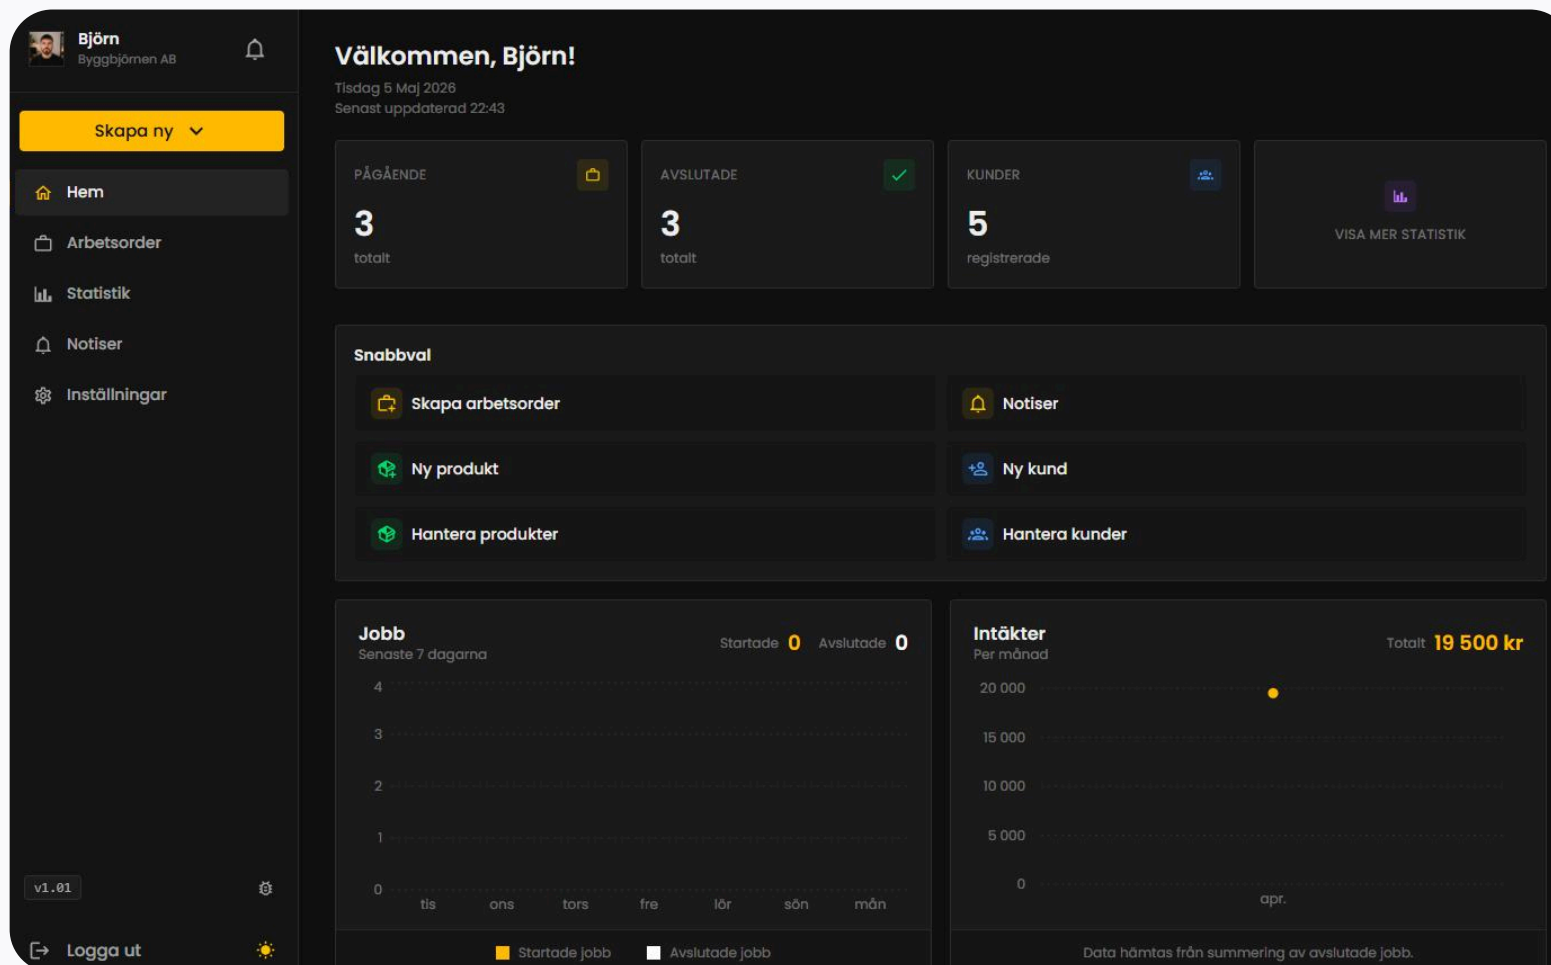

By centralizing customer data, work orders and history, it reduces missed work and prevents lost revenue from unbilled jobs.

Built and maintained by me, currently used by active customers.

- Designed and built full frontend architecture from scratch
- Integrated real-time data handling and state management
- Developed scalable UI components and workflow
- Worked directly with users to iterate on features

TECH STACK

Next.js TypeScript Tailwind CSS React Supabase Netlify

TaskFlow

Personal project

A clean and minimal task management app with focus on productivity and a smooth user experience.

- Drag & drop task organization
- Categories, due dates and reminders
- Local storage + data persistence

TECH STACK

React TypeScript Tailwind CSS LocalStorage

GymTracker

Personal project

A workout tracking application for logging exercises, sets and progress over time.

- Exercise library and custom workouts
- Progress charts and statistics
- Responsive design for all devices

TECH STACK

React TypeScript Tailwind CSS Supabase

RecipeHub

Personal project

A recipe discovery app with search, filters and personal collections.

- Search and filter recipes
- Save favorites and collections
- Fetch data from external API

TECH STACK

React TypeScript Tailwind CSS Rest APIs

ADIGIC Digital Solutions - Business Website

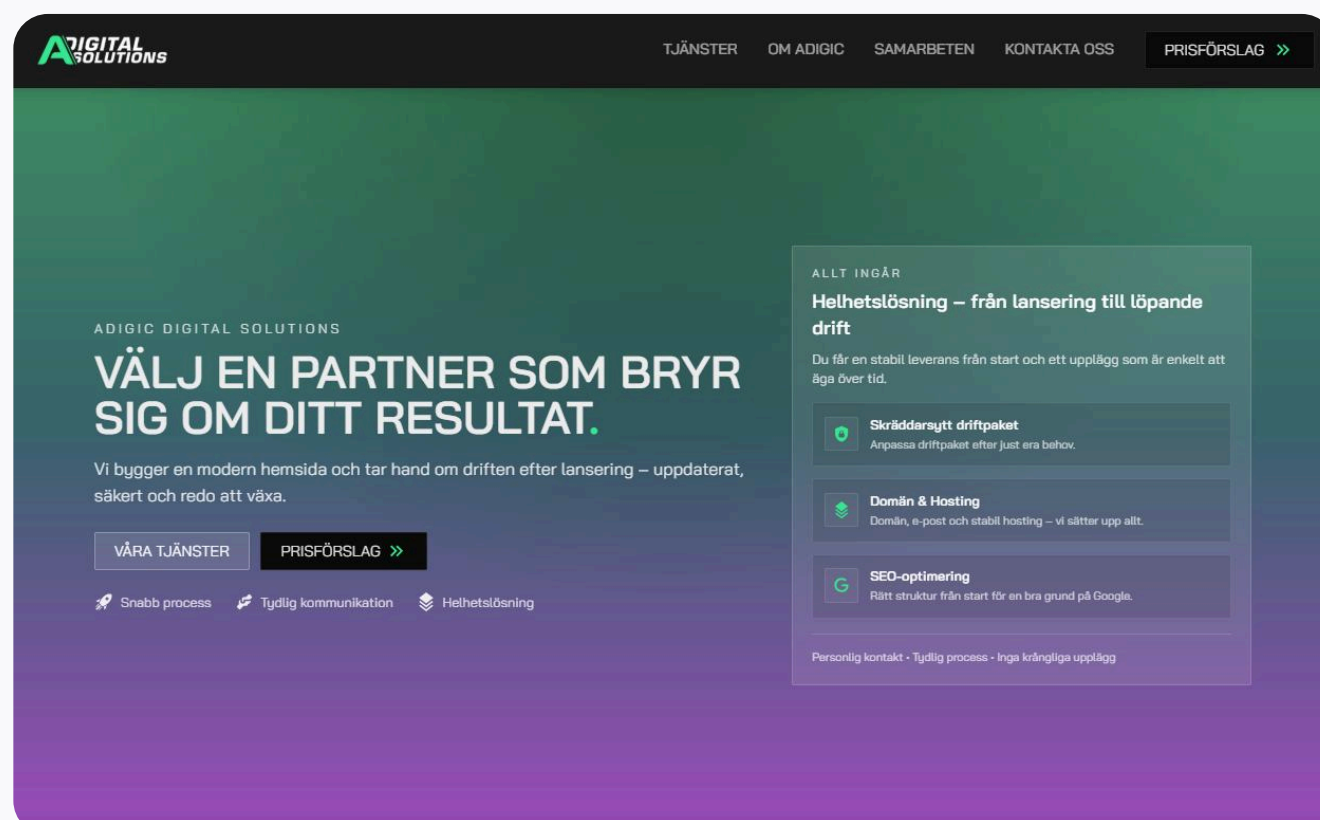

Business Project

Website for my digital solutions business, showcasing services, projects, and client offerings. Designed with a focus on clarity, performance, and conversion.

- Designed and developed responsive UI from scratch
- Focused on performance, SEO and clean user experience
- Structured content to clearly communicate services and value
- Built as a foundation for client acquisition and brand presence

TECH STACK

Next.js React TypeScript Tailwind CSS Netlify Framer Motion

Always building.

I enjoy turning ideas into products that solve real problems and continuously learning new technologies.
